

REDLANDS eACADEMY

Egg Drop Activity Guidelines

Purpose: Design a project that will allow a raw egg to survive a drop from the roof.

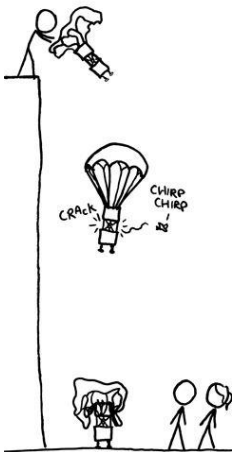

Rules:

- 1) The project may **NOT** be too large for Mr. Finley to carry up a ladder. (like **this** one, for example! →)
- 2) After it is thrown from the roof, you **must be able to OPEN** your project and **REMOVE** the egg (to see if it survived!).
- 3) Eggs must be **raw** and must be provided by participants.

We will test all projects on the first day of school – **Wednesday, August 9th**

You may design and build your own, **OR** you may partner up with someone else. This is an **OPTIONAL** activity, but I'll be a lot of fun. Parents may help, but ideas should come from the students.

Participants are encouraged to **use materials around the house**. Don't make your parents go spend a lot of money on this!

This is **NOT** homework! It's just a **FUN** way to **BLAST OFF** into the new school year!
